REAL ESTATE SOFTWARE QUICK START GUIDE

Prerequisites

Before start the Real Estate Software, ensure the following are in place:

1. Java Development Kit (JDK) Installed:

- Your machine must have Java installed. The software requires at least *Java 17* or a later version.
- If Java is not installed, download and install it from the official [Oracle website](<https://www.oracle.com/in/java/technologies/downloads/>) or your preferred JDK provider.

2. Verify Java Installation:

- Open the Command Prompt (Windows) or Terminal (Mac/Linux).
- Type the following command to check if Java is installed and to verify the version:

```
java -version
```

- You should see output showing the version of Java installed. If Java is not installed, or the version is below the required version, please install the correct version.

INSTALLATION STEPS

1. Download the Software:

- Obtain the real-estate-solution.jar file from the official download link (<http://www.shreetechnoworld.com/resources/file/real-estate-solution.jar>).

2. Locate the Executable Jar File:

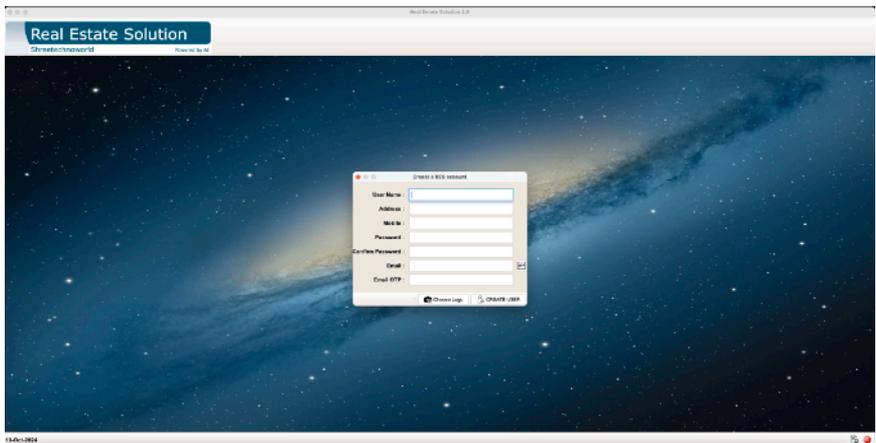

- After downloading, place the real-estate-solution.jar file in a directory where you would like the software to reside.

3. Run the Software:

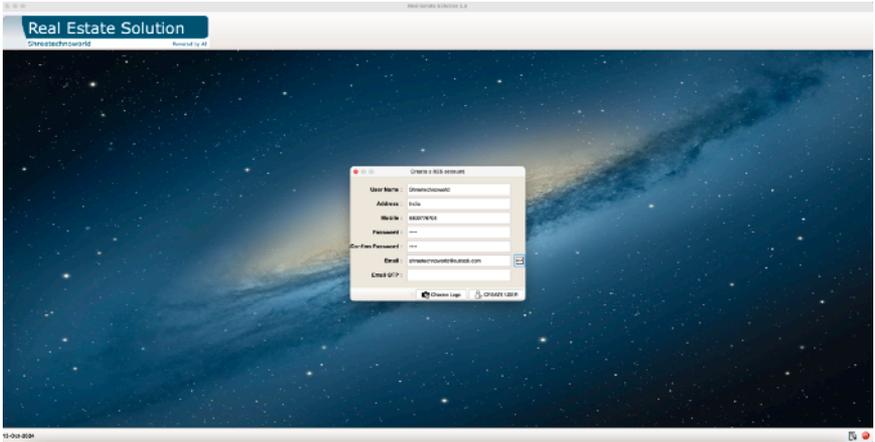

- To run the Real Estate Software, just double click on the jar file.

4. Accessing the Software:

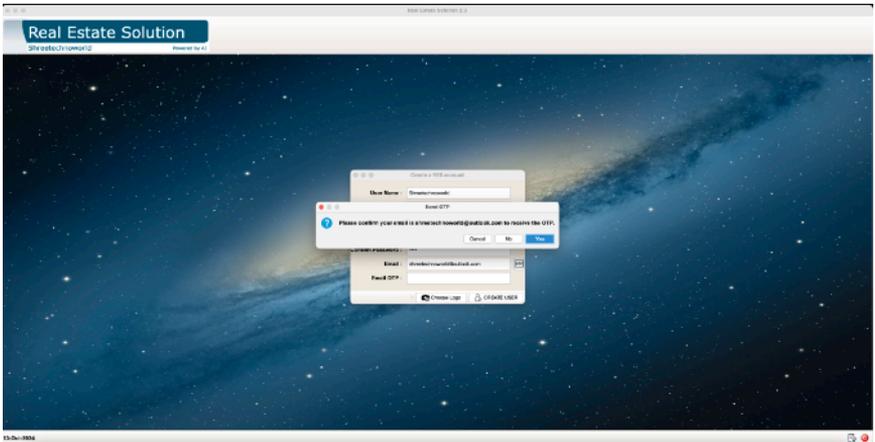

- Once executed, the software should start, and you will be able to interact with it through the provided user interface.

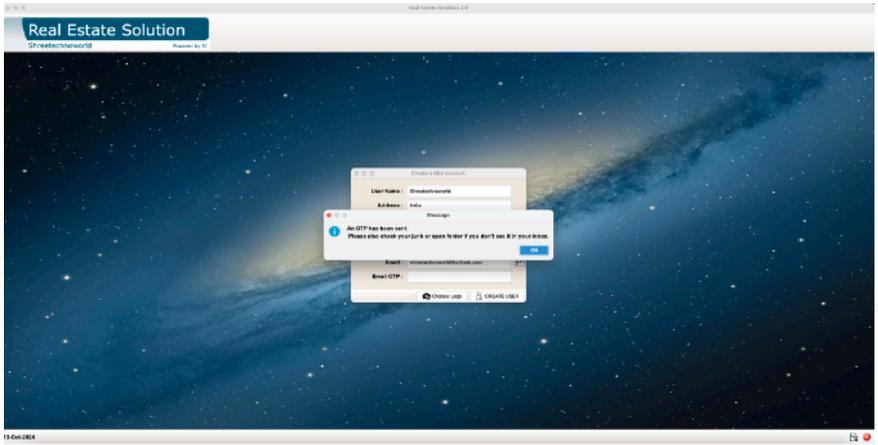

1. Enter all the required details.

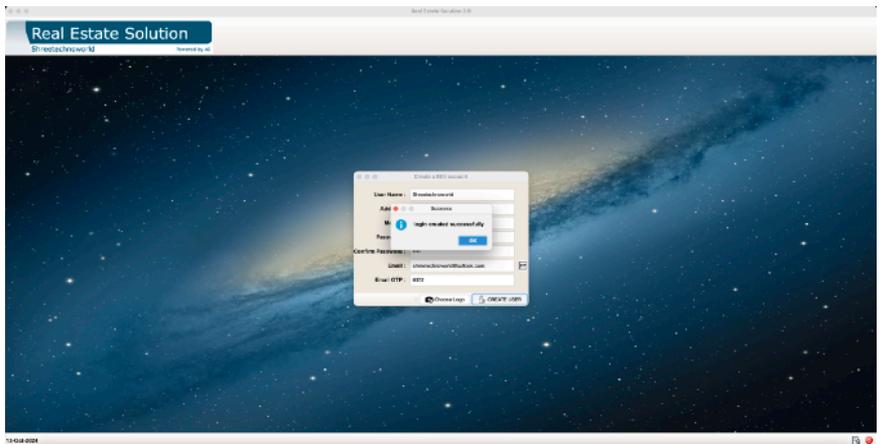

2. Click on OTP Button

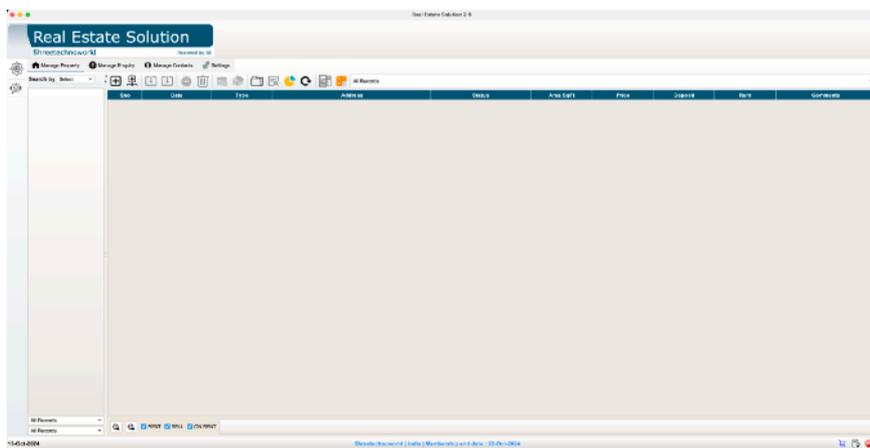

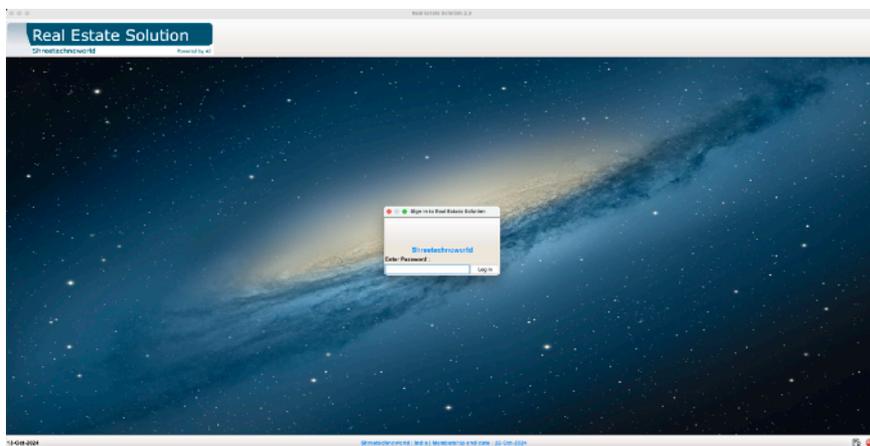

3. Click on “Yes” button and wait while system is sending OTP on email then read the message and click on “OK” button.

4. Enter the OTP received and click “Create User”

5. Button and enter your password for start.

Troubleshooting

- **Java Not Recognized:**

- If you receive an error that Java is not recognized as an internal or external command, make sure Java is correctly installed and the JAVA_HOME environment variable is set.

- **Permissions:**

- On Mac/Linux, you may need to grant execution permissions to the realestate-software.jar file. Use the following command:

```
bash
chmod +x realestate-software.jar
```

Uninstallation

To uninstall the software, simply delete the real-estate-solution.jar file and data files that were created during its use.

This guide should provide a clear path to installing and running your Real Estate Software. Let me know if you need any further adjustments or additional details!
